

**MediMix™**  
**Vial Reconstitution Mixer**  
**(#10288)**

**Instructions for Use**

Always give medication one shake to loosen contents prior to placing on rollers.

Place vials between the rollers in any size mix and match configuration.

Turn power switch to “ON” to begin mixing.

Turn speed dial clockwise to desired speed. For most drugs just turn to full speed for faster reconstitution time.

Note: Reconstitution time will vary depending on drug type, drug manufacturer and vial size.
