

How to Use Rx Destroyer Hardener Packet

Rx Destroyer helps prevent potential messy liquid spills in the waste stream, thereby meeting the SW-846 paint filter standards which are mandatory for liquid waste to be accepted by landfills. **Each Rx Destroyer Liquid Line product comes with Hardener packets included.**

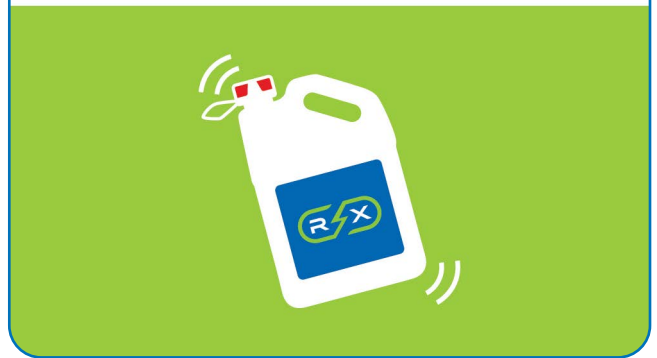

1

Once your Rx Destroyer bottle is full, simply add the sealed hardener pouch(es).

2

Tightly secure the cap and gently agitate bottle until the fluid becomes solid gel. Normally converts to solid gel within 5 minutes.

3

Once contents reach a gel consistency, always follow applicable federal, state, local, and tribal laws & regulations for pharmaceutical waste disposal.
