

ASSEMBLY INSTRUCTIONS FOR

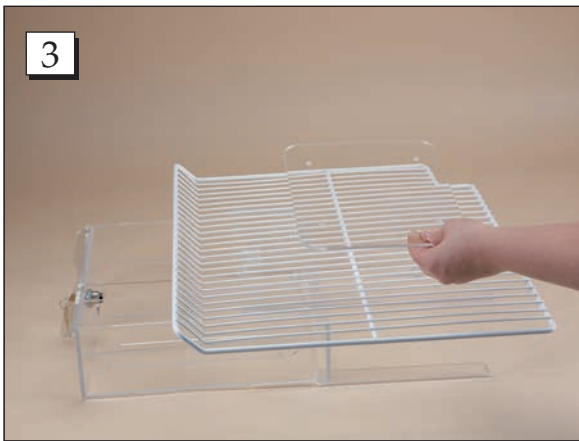

Tilting & Non-Tilting Refrigerator Boxes (#18541 & 18544)

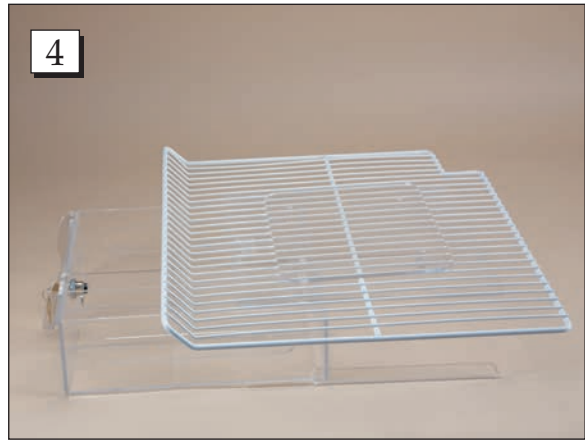

Step 1. Unlock and open the drawer half way so the rear mounting holes are accessible from the back of your box.

Step 2. Place the refrigerator shelf on top of the box.

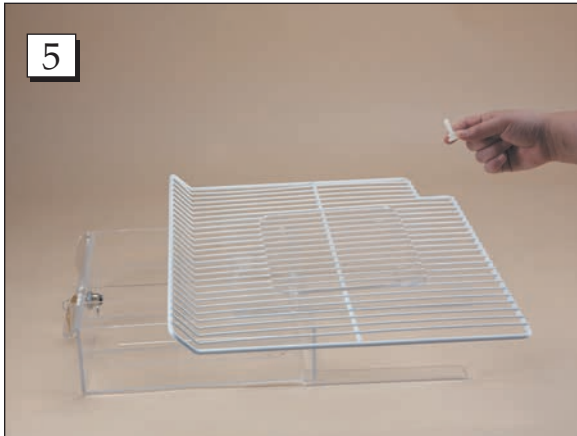

Step 3. Place the retention plate on top of refrigerator shelf.

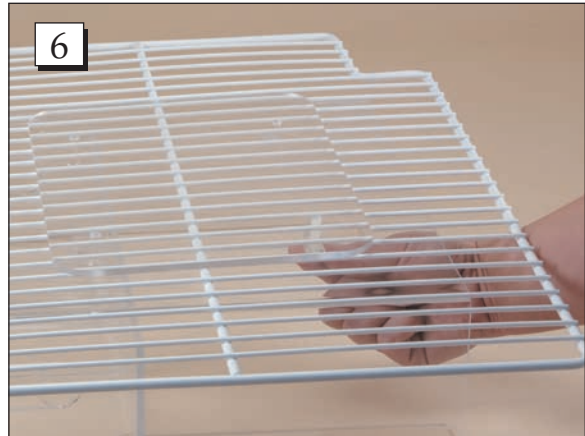

Step 4. Align the mounting holes on the retention plate with those in the top of your box.

ASSEMBLY INSTRUCTIONS FOR

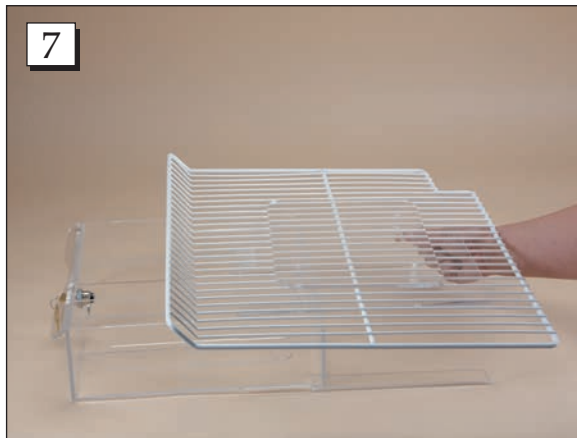

Tilting & Non-Tilting Refrigerator Boxes (#18541 & 18544)

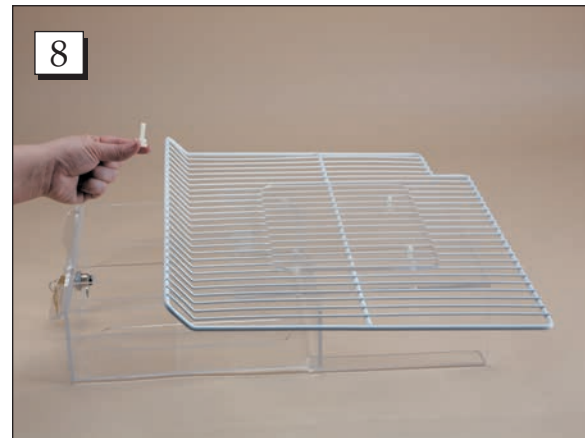

Step 5. To thread the rear screws, the drawer must be pulled out to the front.

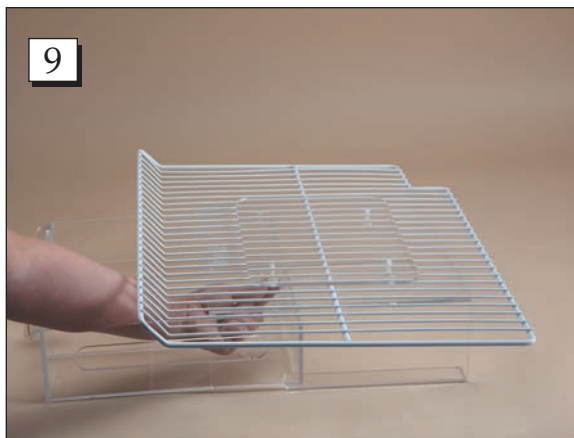

Step 6. Thread the first screw from the inside of the box through the rack into the retention plate - (trap refrigerator rack between box and retention plate).

Step 7. Repeat step six on the remaining rear mounting hole.

Step 8. To thread the front screws, the drawer must be pushed in enough that the front mounting holes are accessible.

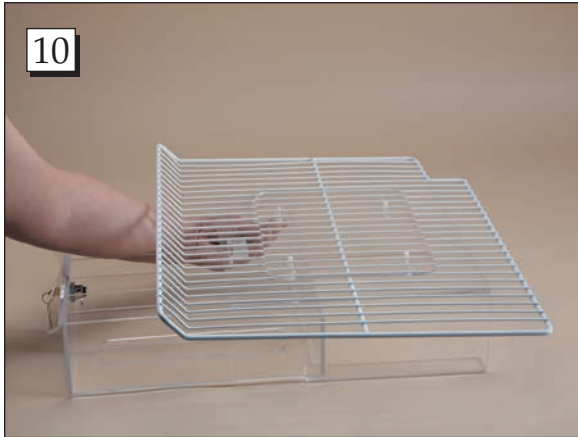

Step 9. Thread the third screw from the inside of the box through the rack into the retention plate - (trap refrigerator rack between box and retention plate).

ASSEMBLY INSTRUCTIONS FOR

Tilting & Non-Tilting Refrigerator Boxes (#18541 & 18544)

Step 10. Repeat step nine on the remaining front mounting hole.

Step 11. Place your box and shelf back into your refrigerator. It is now ready for use.

If you are mounting to a glass shelf or location other than a refrigerator shelf, the double sided tape included with your box can be used.
